

Own The Hash Power

Built on Blockchain. Driven by Mining -

Alphabit is a next-generation Bitcoin mining and data center company built on strategic collaboration with Ethiopia. We leverage reliable energy resources, advanced infrastructure, and optimized mining technology to deliver scalable and efficient Bitcoin mining operations.

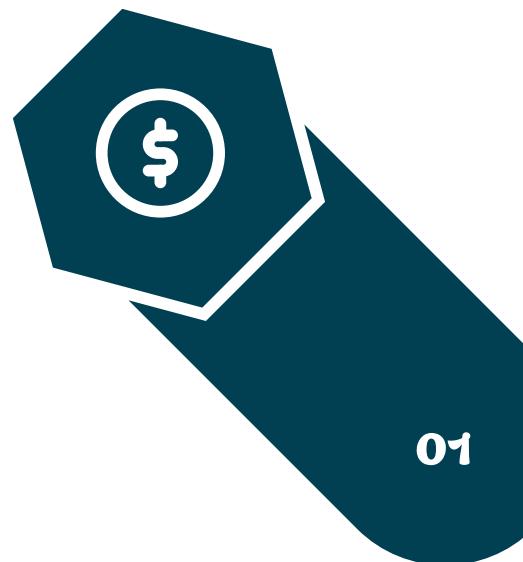

<http://alphabits.live/>

Mining Infrastructure

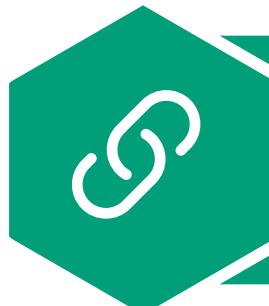

High-performance mining hardware and optimized systems are used to solve complex mathematical problems and secure the network.

01

Network Validation

Miners validate transactions and ensure only legitimate transactions are added to the Bitcoin network.

02

Bitcoin Mining Fundamentals

Mining Rewards

Miners earn rewards in Bitcoin for successfully validating blocks, creating a steady incentive system.

03

04

05

06

Hash Power

Hashrate represents the total computing power dedicated to mining, directly impacting mining efficiency and block discovery speed.

Block Creation

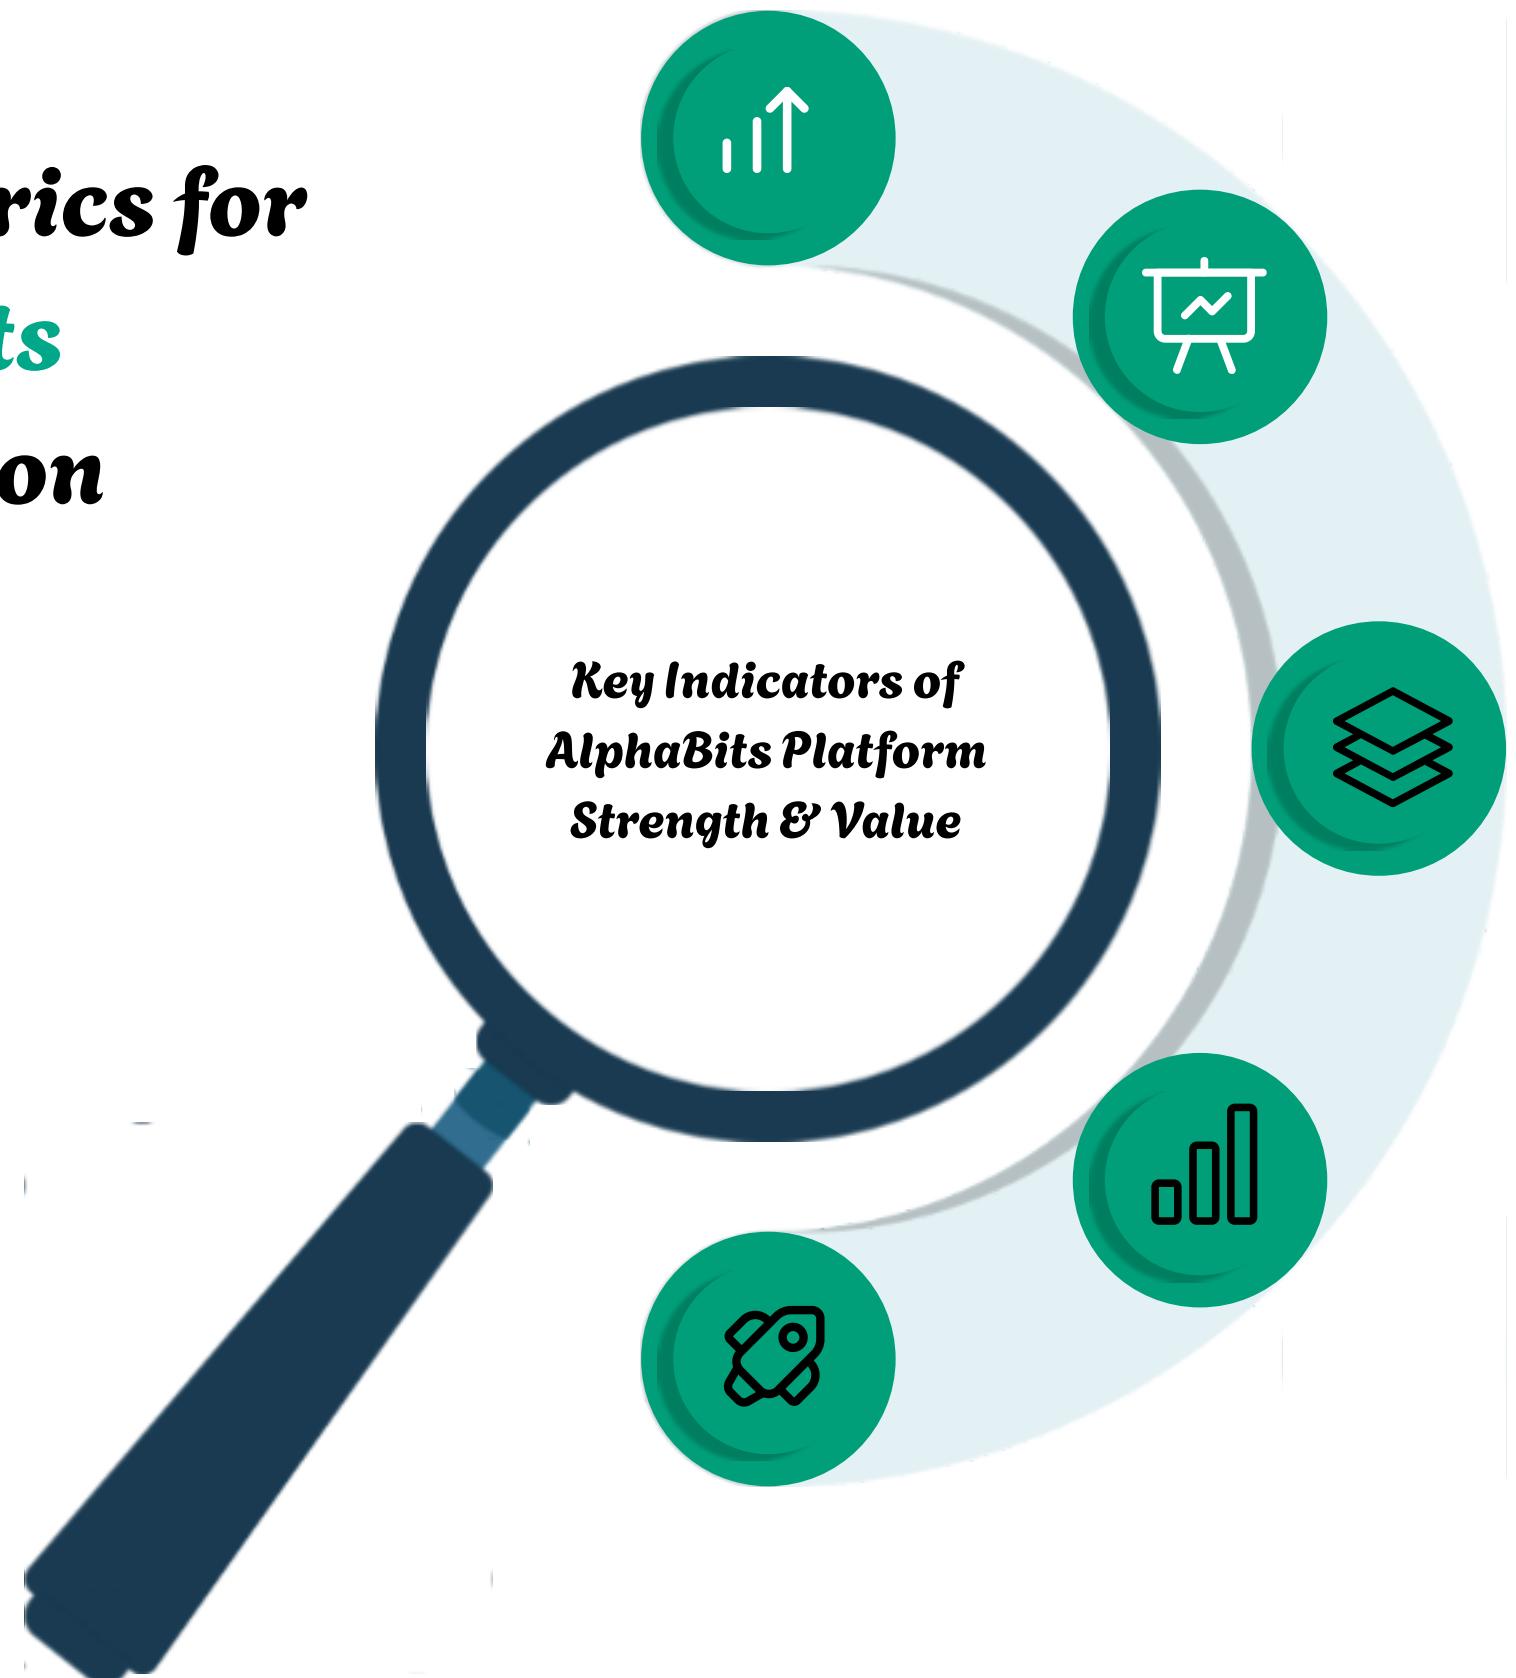

Verified transactions are grouped into blocks and added permanently to the blockchain through mining.

Security & Transparency

Bitcoin mining ensures network security through cryptographic proof and maintains a transparent, tamper-proof ledger.

Key Metrics for AlphaBits Evaluation

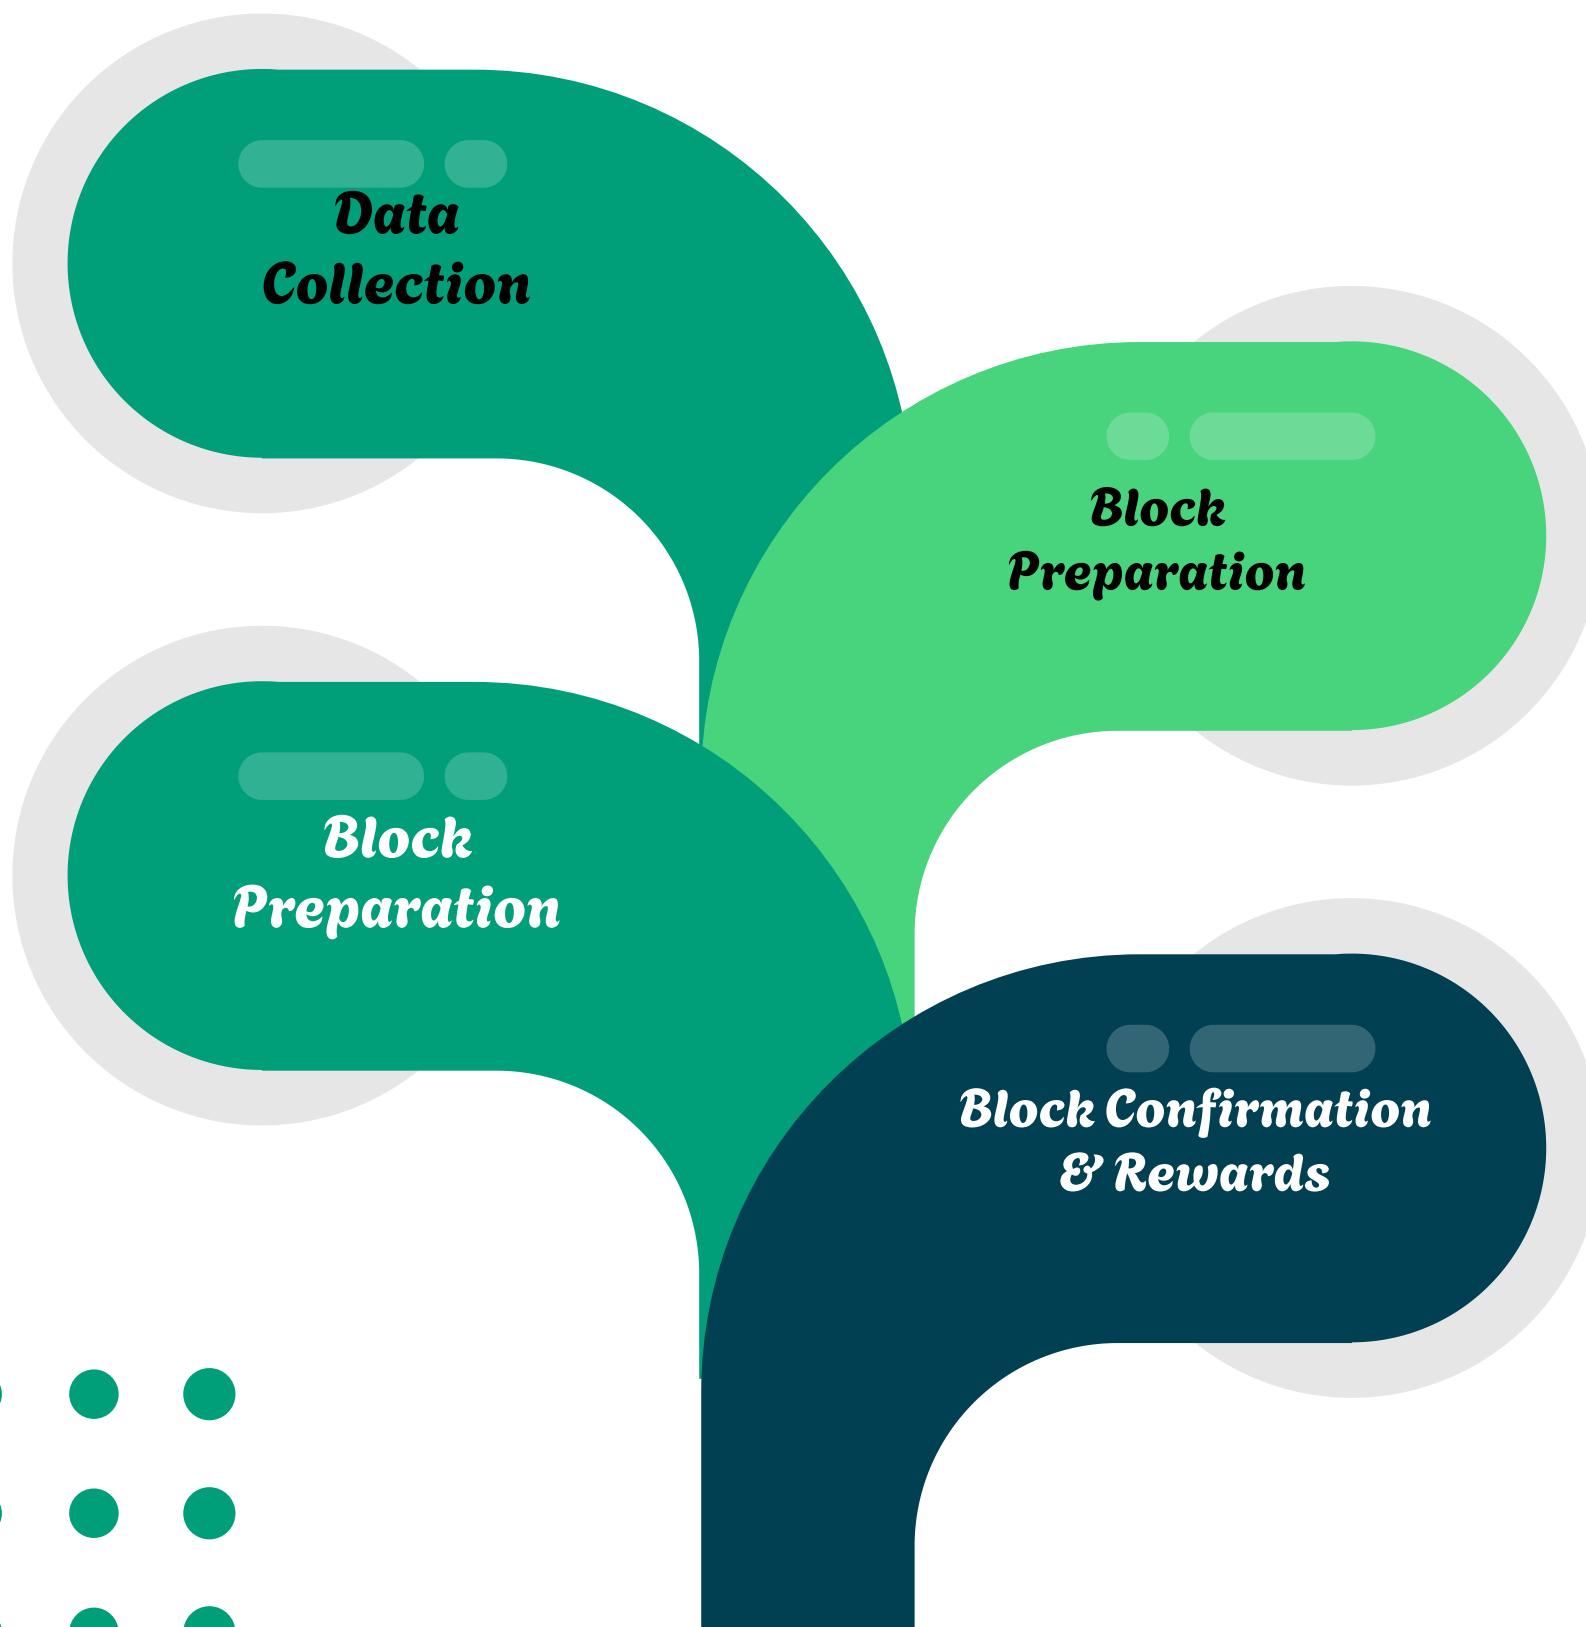

- **Operational Performance**
 - Data entry & processing capacity
 - Task completion accuracy
 - Workflow efficiency
- **Revenue Stability**
 - Service-based income consistency
 - Daily return sustainability
 - Long-term payout capability
- **Network Growth**
 - Active participant base
 - Team expansion rate
 - Balanced business structure (40% / 60%)
- **Leadership Strength**
 - Qualified leadership levels
 - Weekly leadership income performance
 - Leader retention & activity
- **Ecosystem Scalability**
 - Operational expansion readiness
 - Data volume growth
 - Utility coin launch preparedness

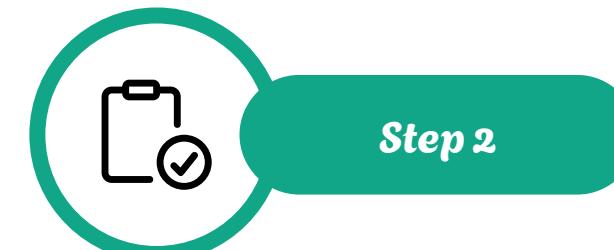

How AlphaBits Mining Works

Operational workflow based on data processing, task execution, and revenue distribution

Step 1

AlphaBits systems collect and organize transaction data from the network for processing.

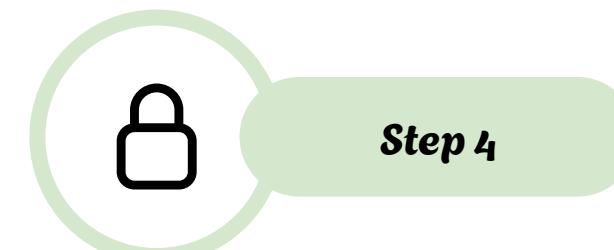

Step 2

The collected data is verified and structured into a secure block ready for mining.

Step 3

Advanced mining infrastructure performs intensive computations to validate the block and secure the network.

Step 4

Once validated, the block is added to the blockchain, and mining rewards are generated and distributed through the **AlphaBits** system.

AlphaBits Investment Plan

Simple packages designed for consistent daily returns and long-term growth

01

CPU MINER X1

Investment: \$10 – \$499
Daily Return: 0.4%
Maximum Return: Up to 250%

02

CPU MINER X2

Investment: \$500 – \$2,499
Daily Return: 0.5%
Maximum Return: Up to 250%

03

CPU MINER X3

Investment: \$2,500 – \$4,999
Daily Return: 0.6%
Maximum Return: Up to 250%

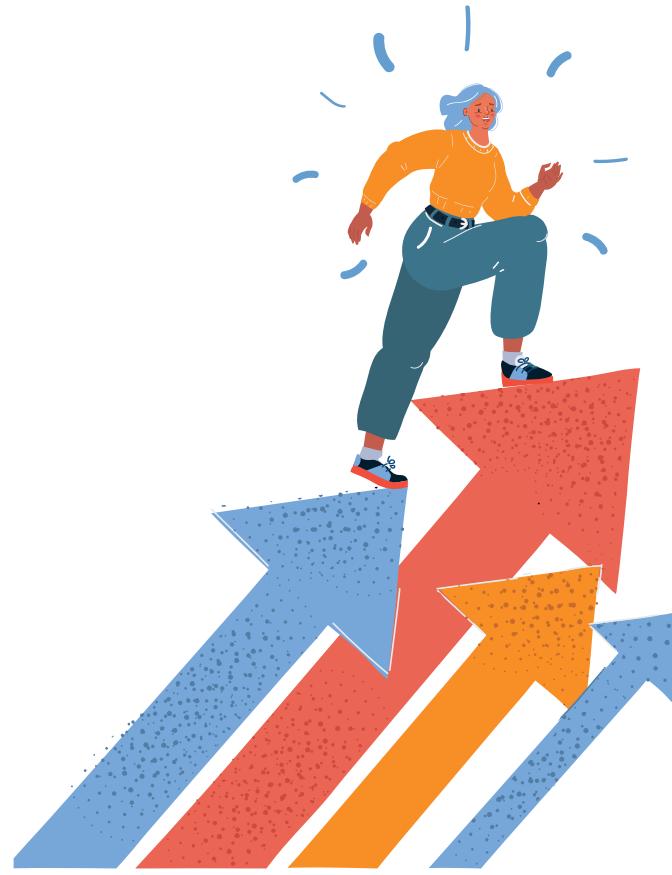

AlphaBits Level Income

| Level Range | Level Percentage | Required Direct |
|-------------|------------------|-----------------|
| Level 1 | 20% | \$100 |
| Level 2 | 10% | \$200 |
| Level 3 | 5% | \$300 |
| Level 4 | 5% | \$400 |
| Level 5 | 5% | \$500 |
| Level 6 | 3% | \$600 |
| Level 7 | 3% | \$700 |
| Level 8 | 3% | \$800 |

Notes :-

- Level income is earned based on the amount of direct business generated by the user. As direct business increases, additional income levels become available.
- Higher income levels are unlocked only after completing the minimum required direct business for that level range.
- The grouped level structure helps make the income plan clear, simple, and easy to understand for all participants.

AlphaBits Level Income

Notes :-

- Level income is earned from the ROI generated through the user's active investment. As the investment continues to produce ROI, level-based income becomes available according to the user's direct business performance.
- Each level is unlocked only after completing the required direct business criteria for that level range. Once unlocked, the user starts receiving level income from the ROI activity of their network.
- The structured level grouping ensures the plan remains transparent, easy to follow, and simple for all participants.

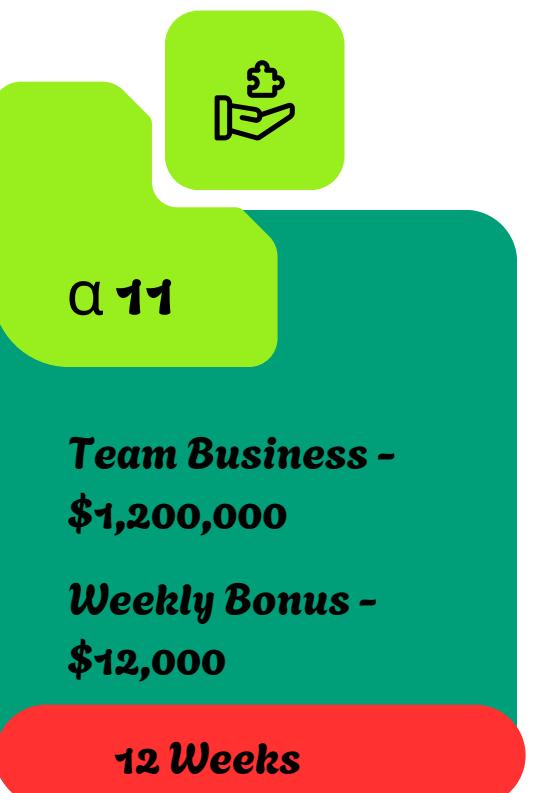

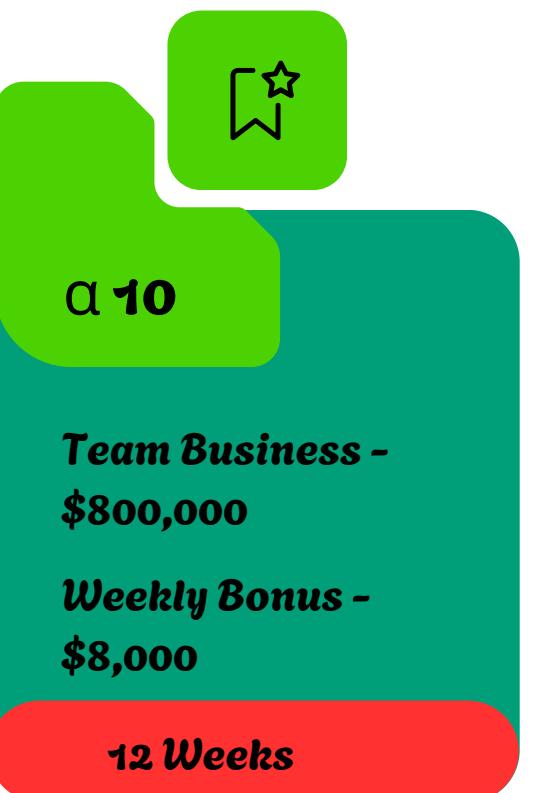

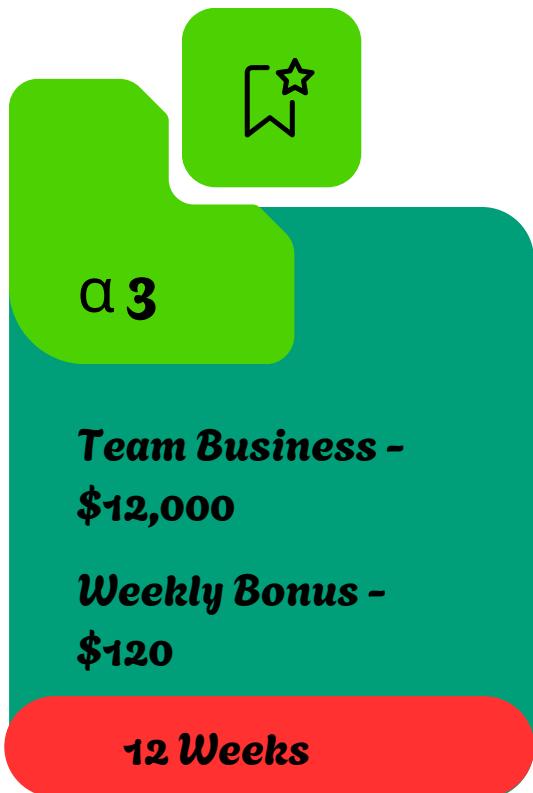

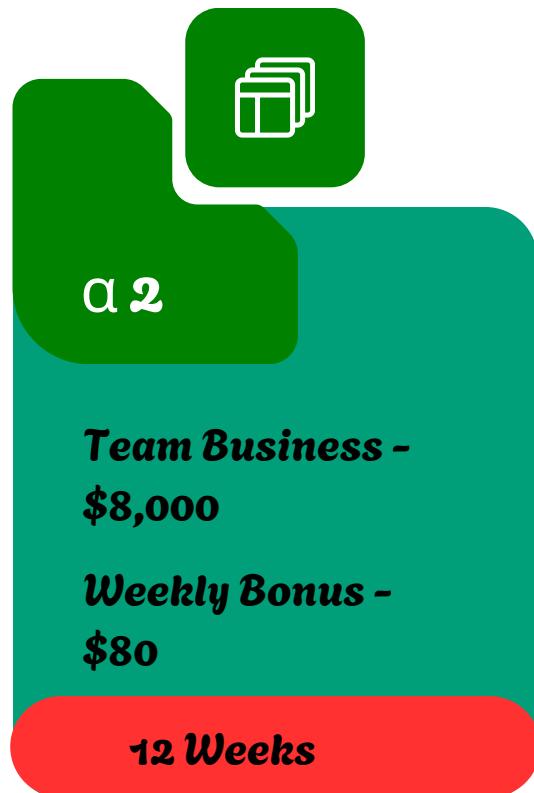

| Level Range | Level Percentage | Required Direct |
|---------------|------------------|-----------------|
| Level 9 | 3% | \$900 |
| Level 10 | 3% | \$1,000 |
| Level 11 | 2% | \$1,100 |
| Level 12 | 2% | \$1,200 |
| Level 13 | 2% | \$1,300 |
| Level 14 | 2% | \$1,400 |
| Level 15 | 2% | \$1,500 |
| Level 16 – 30 | 1% | \$3,000 |

Leadership Ranks & Weekly Bonus

Only 40% business is counted from the strong leg; the remaining 60% must come from other legs.

Achievement Reward

Android Mobile

Laptop

iPad

iPhone 17 Pro

60 gm Gold

Kia Sonet

Mahindra SUV

Fortuner

Mercedes Benz

Range Rover

4 BHK Villa

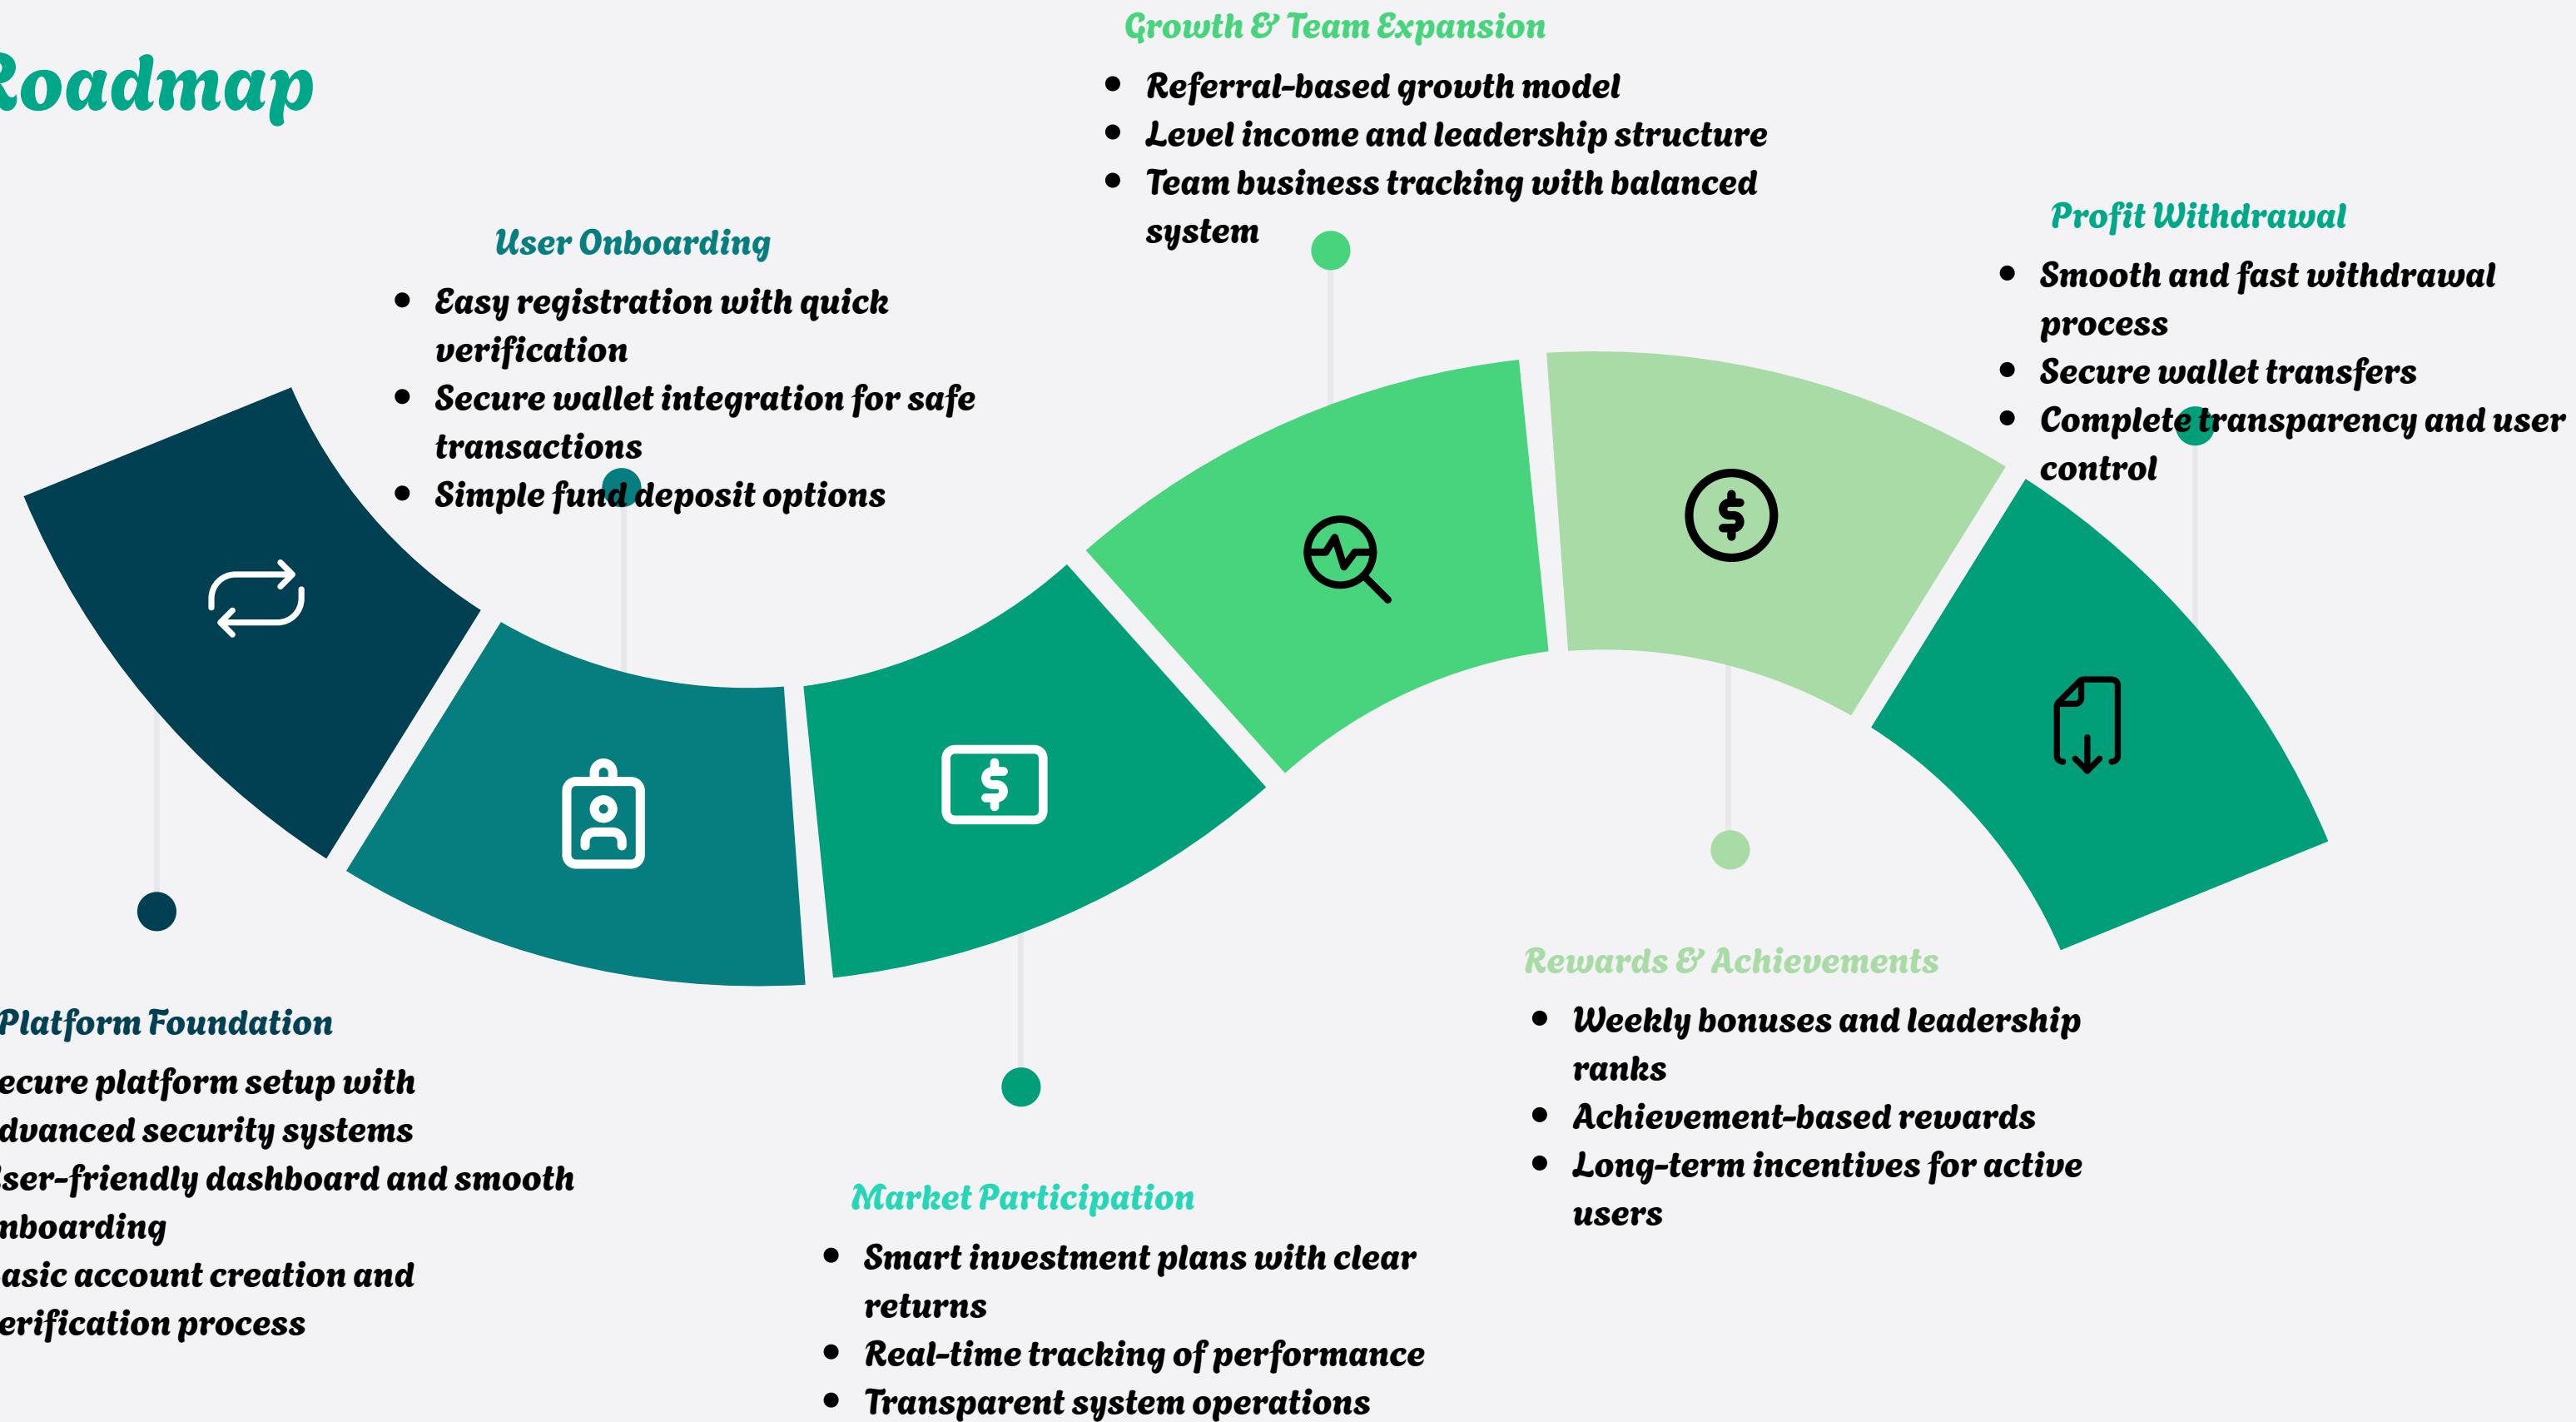

- Only 40% business is counted from the strong leg; the remaining 60% must come from other legs.
- Rewards are based on total team business volume.
- Each reward is unlocked only after completing the required business milestone.
- Rewards are subject to verification and company policy

Reward Conditions

Alphabits Roadmap

Thank you for taking the time to explore Alphabits.

<http://alphabits.live/>

- *We appreciate your interest and trust in our vision.*
- *Alphabits is built with a clear focus on transparency, structured growth, and long-term value creation.*
- *We look forward to growing together and achieving success through strategy, teamwork, and innovation*
